

# Responsible Team Member Achievements

## My Details

Name: Ashar Kamal

Degree: Bachelors of Information and Technology

Company Name: Ontrack Data Analysis

Role title or area: Data requirement analyst

Target grade: Credit

## Plan

This trimester, I plan to enhance my angular development skills, as well as Data acquiring skills as well as Data analysis. I will work effectively with my team with constant communication and problem-solving techniques so together as a team we can achieve the given targets in the time provided. I am also willing to help with Figma and UI/UX designs to upskill them.

## Achievements Report

1. I was always available for team communication including team meeting and chats over teams with individual members (screenshots in Appendix)
2. I learned Figma and designed mocks in that for the project (link attached in Appendix)
3. I developed and designed the Class diagrams and workflow of the program for improving the progress line chart.
4. I successfully made changes in the Ontrack and developed a new kind of page by mimicking the actual work of the On Track (github link and screenshot attached)
5. I helped team members in installation of WSL and Docker.
6. I strived my level best to put the best idea forward and also materialize the ideas given by members.
